Just Think! One Hundred Years!

And Still Serving the Wisest Seed Buyers

THE year 1928 rounds out a full century of continuous business operation, without interruption of any kind, financial or otherwise, and this record, of which we are justifiably proud, has been wrought through the production of quality and quality only. We long ago learned to keep away from the bargain counter as we would the plague, for it is evident to us, and must be to you, that you get only a value commensurate with the selling price of any article, whether it be seeds or shoes, grass or groceries.

Through our catalogue, through advertising, through salesmen, our slogan has always been, "Quality—not the cheapest, but always the best." Inferior sorts have been rigorously discarded. In consequence, Buist Seeds have been the Standard of Excellence for **one hundred years**, winning numerous certificates and medals for their purity and quality. We make no apologies for the statement that no better seeds than Buist's can be purchased anywhere.

The Anniversary Number of our Garden Guide and Catalogue has already been mailed you with the hope that you will be pleased with this book, as we have tried to make it interesting, attractive, and informative. We solicit your orders on the basis of sound quality at a fair price, and hope you will write for a copy if you do not already have one.

We are offering herein a number of Hundredth Anniversary Specials to commemorate the occasion and trust you will be able to share in them.

BUIST'S BIG FOUR For the Vegetable Garden

Illustrated in Color on This Page

Buist's Perfect Model Beet. Uniform size, globe shape, and very early. Flesh deep vermilion-red, sweet and tender; fine for canning Pkt. 10 cts.

SOME of BUIST'S SEEDS *with a*

Annuals for Immediate Results

Annual flowers bloom in a few weeks from seed, and thus a brilliant array of bloom may be had the same season. They are ideal for furnishing a new garden quickly or for filling in the spaces between shrubs and perennials.

Many of the finest flowers for cutting are Annuals, and may be grown easily and surely from seed with very little trouble and at minimum cost.

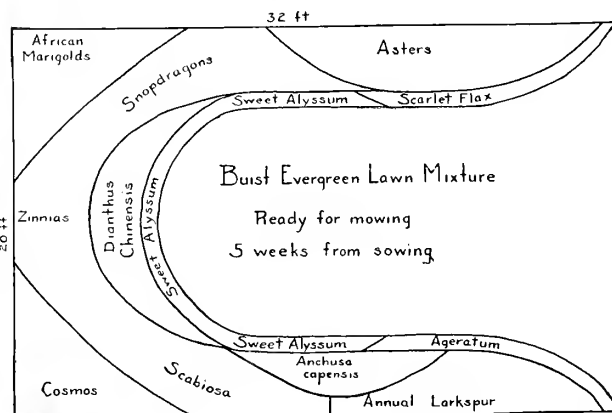

Below is the plan of a garden composed entirely of Annuals. It is adaptable to many situations, and can be narrowed or broadened to suit almost any shaped plot.

The varieties selected will give almost continuous flowers for cutting and garden brightness from June until frost. It can be adapted to any size yard by shortening one dimension or by halving it.

SELECTED VARIETIES

ASTER, GIANT CREGO. Pink.....	Pkt. \$0 10
ANCHUSA CAPENSIS. Lovely blue	10
ALYSSUM, SWEET, LITTLE GEM. Pure white. For edging	10

This page in our complete Garden Guide and Catalogue explains how to sow and grow flower seeds. The instructions are simple and easily understood and further cultural details are set forth on the backs of all packets.

From pages 99 to 132 will be found a most complete assortment of the finest Annual and Perennial flowers offered and described in full.

Buist's Improved Mixed Giant Zinnias. Packet

15c.

One packet each of six separate colors of Buist's Improved Giant Zinnias for

70c.

CENTURY-OLD REPUTATION

Perennials for Permanent Gardens

For permanent garden effects, Perennials are best as they live over winter and come up every spring to bloom at their season, increasing in size and numbers every year. It takes a full year to raise them from seed, however, so that seeds of Perennials sown this spring cannot be expected to flower before the summer of 1929.

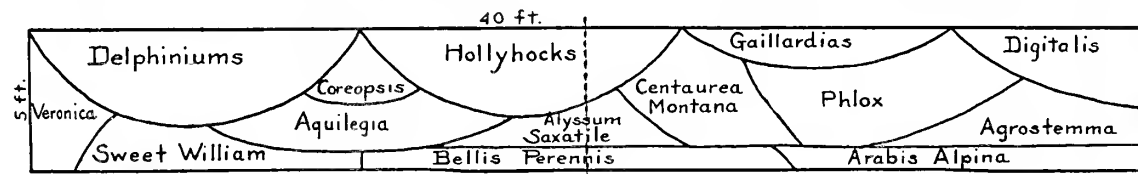

A FEW THAT ALWAYS PLEASE

The plan below is merely a suggestion for planting a long narrow border or bed. It may be along a fence, wall, or hedge, or even in the open. If there is not room, it may be cut square across the middle at the dotted line and the sections placed facing each other across a 3 or 4-foot path. The selection will give early spring and summer bloom, and as the plants die down, quick-growing Annuals may be sown among them to provide flowers until the approach of winter.

Foxglove or Digitalis

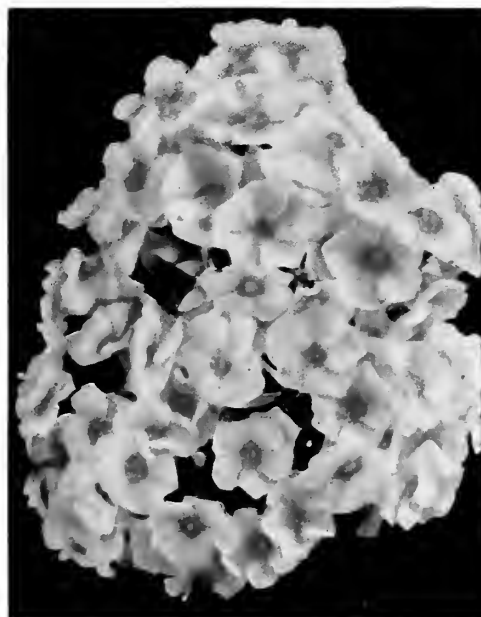

VERONICA (SPEEDWELL). Bright blue.....	Pkt. \$0 10
DELPHINIUM, GOLD MEDAL HYBRIDS. Shades of blue.....	15

BUIST'S LAWN GRASS SEED

READY FOR MOWING FIVE WEEKS FROM SOWING

A BEAUTIFUL, velvety lawn surrounding a house adds not only to its value but enhances the enjoyment of the home. Such lawns may be obtained from our mixtures, which are the result of many years of experience in blending the finest varieties of grasses, to produce not only a luxuriant sod but the color and beauty of an emerald. From early spring until late fall, lawns sown with our grass seed remain green and fresh, for our mixtures include quick-growing varieties which are at their best soon after the frost is out of the

ground; others mature and flourish in midsummer; still others are greenest and sturdiest in autumn.

We cannot recommend too highly the use of our popular leader, Buist's Evergreen Lawn Grass Seed, at the following prices:

Quart	\$0 30	Peck	\$1 75
2 quarts	55	½ bushel	3 50
4 quarts	1 00	Bushel (20 lbs.)	6 50

For prices of other preparations and cultural instructions, see pages 91 and 92 of our complete Garden Guide and Catalogue.
